## INTRODUCTION

The Bachelor of Arts (BA) Programme offered through the Open and Distance Learning (ODL) mode is designed to provide flexible, accessible, and quality higher education to diverse learners. The programme offers a strong foundation in humanities, social sciences, and languages while allowing students to choose from a range of departmental electives according to their interests and career aspirations. The curriculum integrates language studies, environmental awareness, creative and content writing, and regional cultural studies to promote holistic development. Through self-learning materials, learner support services, and continuous assessment, the programme fosters critical thinking, communication, analytical, and professional skills. Spread across six terms with 120 credits, it prepares learners for higher education, employment, entrepreneurship, and lifelong learning.

## PROGRAMME OUTCOMES

**P01: Communication skills:** identify, speak and write about different genres, forms, periods and movements in humanities.

**P02: Reflective thinking:** comprehend and participate with various art forms and its related concepts and applications.

**P03: Disciplinary knowledge:** understand appreciate, analyse and use different theoretical frameworks.

**P04: Critical thinking:** locate in and engage with relevant scholarly works in order to develop one's own critical position and display one's views coherently and persuasively.

**P05: Moral and ethical values:** analyse oneself with respect to societal norms.

**P06: Multicultural competence:** ability to see and respect difference and to transcend binaries.

**P07: Leadership Readiness:** acquire, practice and lead a socially responsible life.

**P08: Life-long Learning:** attain, retain, build-up and transfer domains skills to other domains of one's life and work.

**P09: Digital Literacy:** gain hands on experience on digital platforms and use them constructively.

**P010: Research-Related Skills:** identify the problem, formulate research questions, and identify and consult relevant sources to find solutions.

## PROGRAMME SPECIFIC OUTCOMES

**PS01:** Exploring topics across a range of subject boundaries to pursue new knowledge in different subject areas.

**PS02:** Appreciate social values, ethics, and develop interpersonal skills essential in different fields, both academic and non-academic.

### **SALIENT FEATURES**

**Interdisciplinary Curriculum:** Demonstrate knowledge in one or more disciplines and integrate that perspective across disciplinary boundaries.

**Computer Skills:** Learn the basic computer skills.

**Professional Enhancement:** Subjects like communication and soft skills to enhance personality and employability.

**Community Development:** Exposure to grass-root level socio-political issues through Field visits, Surveys and Community Development projects.

**PROGRAMME CODE: 4120-S**

**DURATION OF THE PROGRAMME:**

**Minimum Duration:** 3 years

**Maximum Duration:** 6 years

**MEDIUM OF INSTRUCTION/EXAMINATION:**

Student has the option of writing the Exam in English/ Hindi/ Punjabi language except Computer Applications and Management courses which are offered in English medium only and Language related courses which are offered in respective languages.

**Course Outcomes: Through this course student should be able to**

**CO1:** apply empirical aspects of elasticity of demand in practical scenarios

**CO2:** examine the impact of risk and uncertainty on consumer decision-making.

**CO3:** evaluate the efficiency of different types of production functions

**CO4:** appraise the efficiency of different market structures in determining price

**CO5:** execute the concepts of price determination in monopoly and monopolistic markets to real-world scenarios.

**CO6:** assess the effectiveness of different models in explaining oligopoly behavior.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                               |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Basic concepts and principles:</b> Definitions and scope; types of economic analysis; managerial economics; economic principles relevant to managerial decision.                                                                                          |
| <b>Unit-2</b>   | <b>Demand and Supply Analysis:</b> Introduction; Demand: Law of demand; shift and movement; exceptions of the law of demand, Law of supply: shift and movements. Market Equilibrium, Elasticity of demand: introduction; price, income and cross elasticity. |
| <b>Unit-3</b>   | <b>Consumer preference and choice:</b> Utility Analysis; Indifference curve analysis; consumer's equilibrium: Cardinal & Ordinal; consumer surplus, income, Price & Substitution effect.                                                                     |
| <b>Unit-4</b>   | <b>Production Theory:</b> Types of input; production function; Isocost lines; producer's equilibrium; expansion path.                                                                                                                                        |
| <b>Unit-5</b>   | <b>Cost concepts:</b> Introduction, kinds of cost, short & long run cost; Linkage between cost, revenue and output through optimization, Economies of Scale; internal and external                                                                           |
| <b>Unit-6</b>   | <b>Market structure:</b> Perfect competition: Introduction, features, short run & long run equilibrium. Perfect competition: Existence in Real World                                                                                                         |
| <b>Unit-7</b>   | <b>Monopoly:</b> Introduction, types; price and output determination in short run & long run. Economic inefficiency of monopoly.                                                                                                                             |
| <b>Unit-8</b>   | <b>Monopolist Competition:</b> Introduction, features, short run & long run equilibrium, monopolistic competition and advertising.                                                                                                                           |
| <b>Unit-9</b>   | <b>Oligopoly:</b> Features, Types, Kinked demand curve.                                                                                                                                                                                                      |
| <b>Unit-10</b>  | <b>Pricing Decisions:</b> Cost based pricing; pricing based on firm's objective; competition-based pricing.                                                                                                                                                  |

### **LABORATORY WORK:**

1. Hardware familiarizing with various I/O Peripheral devices, storage devices.
2. Familiarity with DOS, Implementing various internal and external commands in DOS.
3. MS Windows: Familiarizing with windows operating system; using built-in accessories; managing files and folders using windows explorer; working with control panel; installing hardware and software.
4. MS-Office (or any other Office Suite), meaning and features, its components.
5. MS-Word (or any other word processor): Creating Document Files, Saving, Closing Files, Page Settings and Formatting Text. Spell Checking, Thesaurus, Creating Tables, Adding rows, columns. Printing Documents, Setting Print Settings, creating labels and mail merge, taking Print outs
6. Ms-Excel-Working with worksheet, formulas & functions, Inserting charts, Printing in Excel
7. MS Power Point-Views, Designing, viewing, presenting & Printing of Slides.
8. Internet: Navigating with Internet Explorer; surfing the net, using search engines; using email facility.

**Course Outcomes: Through this course student should be able to**

**CO1:** describe the general structure and function of major social institutions

**CO2:** interpret the various theoretical perspectives of social institutions

**CO3:** analyze the various changes taking place in the social institutions and its impact on society

**CO4:** evaluate the interrelationship between social institutions and broader socio-economic, political, and cultural processes.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                        |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | Economic & Society: Man, nature and social production, Economic system of simple and Complex Societies–barter and ceremonial exchange |
| <b>Unit-2</b>   | Economic & Society (Part-2): Market economy and control economy, Jajmani system                                                       |
| <b>Unit-3</b>   | Family and Marriage: Different forms of family and marriage                                                                           |
| <b>Unit-4</b>   | Family and Marriage (Part-2): Changes in family pattern worldwide, Alternatives to family; Divorce and Separation                     |
| <b>Unit-5</b>   | Kinship: Importance of Kinship                                                                                                        |
| <b>Unit-6</b>   | Politics in Society: Sociological Theories of Power and Bureaucracy                                                                   |
| <b>Unit-7</b>   | Politics in Society (Part-2): Political Parties and Pressure Groups, Nation State and Citizen ship, Democracy                         |
| <b>Unit-8</b>   | Religion: Types of religious practices: Animism, monism, Pluralism, Sects, Cults                                                      |
| <b>Unit-9</b>   | Religion in Modern Society: Religion and Science and Secularization                                                                   |
| <b>Unit-10</b>  | Religious revivalism and fundamentalism                                                                                               |

**Course Outcome: Through this course student should be able to**

**CO1:** explain data processing concepts, data representation, machine cycles, and memory components.

**CO2:** understand the concepts of operating system functions, its types, user interfaces, hardware management, and utility software.

**CO3:** utilize the role of networks, data communication methods, topologies, protocols, and wireless technologies.

**CO4:** apply knowledge of graphics, multimedia, databases, programming, and security measures to practical scenarios.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                    |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Processing Data:</b> Transforming data into information, How computers represent data, How computers process data, Machine cycles, Memory, Registers, The Bus, Cache Memory                                                                    |
| <b>Unit-2</b>   | <b>Using Operating Systems:</b> operating system basics, Purpose of the operating system, types of operating system, Providing a user interface, Running Programs, Sharing Information, Managing Hardware, Enhancing an OS with utility software. |
| <b>Unit-3</b>   | <b>Networks:</b> Sharing data anytime anywhere, Uses of a network, Common types of a network, Hybrid Networks, How networks are structured, Network topologies and Protocols, Network Media, Network Hardware                                     |
| <b>Unit-4</b>   | <b>Data Communication:</b> Local and Global reach of the network, Data communication with standard telephone lines and Modems, Using Digital Data Connections, Wireless networks                                                                  |
| <b>Unit-5</b>   | <b>Graphics and Multimedia:</b> Understanding graphics File Formats, Getting Images into your Computer, Graphics Software, Multimedia Basics                                                                                                      |
| <b>Unit-6</b>   | <b>Data Base Management Systems:</b> The Database, The DBMS, Working with a database, Databases at Work, Common Corporate Database Management Systems                                                                                             |
| <b>Unit-7</b>   | <b>Software Programming and Development:</b> What is computer Program, hardware/Software Interaction, Planning a Computer Program, How programs Solve Problems,                                                                                   |
| <b>Unit-8</b>   | <b>Programming Languages and Programming Process:</b> Categories of Programming Languages, Machine and Assembly Language, Higher Level Languages, WWW development languages, The SDLC of Programming                                              |
| <b>Unit-9</b>   | <b>Understanding The Need of Security Measures:</b> Basic Security Concepts, Threats to Users, Threats to Hardware, Threat to Data, Cyber Terrorism.                                                                                              |
| <b>Unit-10</b>  | <b>Taking Protective Measures:</b> Keeping your System Safe, Protecting Yourself, Protecting your Privacy, Managing Cookies, Spyware and other BUGS, Keeping                                                                                      |

|  |                                                               |

**Course Outcomes: Through this course, the student will be able to**

**CO1:** understand the scope, importance, and methods of collecting, classifying, and presenting statistical data.

**CO2:** apply measures of central tendency, dispersion, correlation, and regression for data analysis.

**CO3:** construct and interpret index numbers, analyze time series, and evaluate trends.

**CO4:** use probability concepts and probability distributions for decision-making under uncertainty.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                                         |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Statistics:</b> Introduction, Importance, Scope and Limitations of Statistics                                                                                                                                                                                       |
| <b>Unit-2</b>   | <b>Classification, Tabulation and Presentation of Data:</b> Geographical, Chronological, Qualitative and Quantitative Classification, Formation of Frequency Distribution, Tabulation of Data, Types of Tables, Bar Diagrams, Pie Diagrams, Pictograms and Cartograms. |
| <b>Unit-3</b>   | <b>Collection of Data:</b> Primary and Secondary Data, Method of Collecting Data, Drafting the Questionnaire, Sources of Secondary Data.                                                                                                                               |
| <b>Unit-4</b>   | <b>Measures of Central Tendency:</b> Mean, Harmonic Mean, Geometric Mean, Median and Mode                                                                                                                                                                              |
| <b>Unit-5</b>   | <b>Measures of Dispersion:</b> Range, Mean deviation, Quartile deviation, Standard deviation, Coefficient of variation                                                                                                                                                 |
| <b>Unit-6</b>   | <b>Correlation Analysis and Regression Analysis:</b> Scatter Diagram, Karl Pearson's, Rank Correlation, Regression Equations-Deviation taken from Assumed mean and Arithmetic Mean, Least square method, Graphing Regression Lines                                     |
| <b>Unit-7</b>   | <b>Index Number:</b> Methods of Constructing index Number- Laspeyres, Paasche, Bowley's, Fisher and Marshall- Edgeworth method, Chain base Index Number                                                                                                                |
| <b>Unit-8</b>   | <b>Analysis of Time Series:</b> Method of Semi-average, Moving average, Simple average, Ratio- to-trend method, Ratio-to-Moving average Method                                                                                                                         |
| <b>Unit-9</b>   | <b>Probability and Expected value:</b> Addition Theorem, Multiplicative Theorem                                                                                                                                                                                        |
| <b>Unit-10</b>  | <b>Probability Distribution:</b> Binomial, Poisson and Normal Distribution                                                                                                                                                                                             |

**Course Outcomes: Through this course student should be able to**

**CO1:** recall key facts, themes, and characters from the prescribed texts.

**CO2:** summarize and explain the central ideas and literary devices.

**CO3:** use insights from texts to support answers, discussions, and writing tasks.

**CO4:** compare themes, styles, and perspectives across different authors.

**CO5:** form and justify opinions on characters, ideas, and author viewpoints.

**CO6:** develop original compositions inspired by the studied works.

**Course Outcomes: Through this course, students will be able to**

**C01:** analyze the meaning, objectives, and scope of financial management, and apply the core finance functions—investment, financing, liquidity, and dividend decisions—in practical business contexts.

**C02:** evaluate various sources of finance and the cost of capital, including computation using book value and market value weights, and apply time value of money concepts for informed decision-making.

**C03:** assess investment opportunities through capital budgeting techniques under conditions of risk and uncertainty and formulate optimal capital structure decisions using leverage analysis and dividend policy theories.

**C04:** design effective working capital management strategies, including cash, inventory, and receivables management, while demonstrating awareness of capital markets and financial institutions.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                       |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | Meaning, Objectives and Scope of Financial Management<br><b>Finance Functions:</b> Investment, Financing, Liquidity and Dividend Decisions                                                           |
| <b>Unit-2</b>   | <b>Sources of Finance:</b> Evaluation of Short term and long-term source of finance                                                                                                                  |
| <b>Unit-3</b>   | Concept of Time Value of Money                                                                                                                                                                       |
| <b>Unit-4</b>   | <b>Cost of Capital:</b> Concept and its significance, measurement of cost of capital of various sources of funds, Weighted Average cost of capital using book value weights and market value weights |
| <b>Unit-5</b>   | <b>Capital Budgeting:</b> meaning, importance, Risk and uncertainty, Estimation of Project Cash Flows, Discounting and non-discounting techniques of Capital Budgeting, Concept of Capital Rationing |
| <b>Unit-6</b>   | <b>Capital Structure Decision:</b> Understanding debt and equity, theories of Capital Structure, Optimum Capital Structure                                                                           |
| <b>Unit-7</b>   | <b>Leverage:</b> Operating, Financial Leverage and combined leverage, indifferent point                                                                                                              |
| <b>Unit-8</b>   | <b>Dividend Decisions:</b> Dividend Policy; Forms of dividend, Theories of dividend, Factors affecting dividend decisions                                                                            |
| <b>Unit-9</b>   | <b>Working Capital:</b> Concept, operating and cash cycle, Determinants working capital requirements, Overview of management of cash                                                                 |
| <b>Unit-10</b>  | Inventory Management, Receivables Management Capital Markets and Financial Institutions                                                                                                              |

**Course Outcome:** Through this course, students will be able to

**C01:** explain DBMS fundamentals, database models, languages, and transaction management concepts.

**C02:** apply relational algebra, SQL, and advanced queries to create, modify, and retrieve database data.

**C03:** design databases using ER modeling, normalization, and relational database design principles.

**C04:** manage transactions, concurrency, recovery, integrity constraints, and database security.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                                                                                        |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Introduction to fundamentals of DBMS:</b> Database applications, Purpose of database systems, Views of data, Database languages, Relational Databases, Database Design, Transaction Management                                                                                                                     |
| <b>Unit-2</b>   | <b>Relational Databases:</b> Relational Model, Structure of Relational databases, fundamental, additional and extended relational algebra operations, Null Values, Modification of database                                                                                                                           |
| <b>Unit-3</b>   | <b>SQL:</b> Data Definition, datatypes, schema definition, Basic structure of SQL Queries, creating tables, DML - SELECT, INSERT, DELETE and UPDATE operations, DDL commands                                                                                                                                          |
| <b>Unit-4</b>   | <b>Advanced SQL:</b> Set Operations – UNION, INTERSECT, EXCEPT, Aggregate Functions, NULL values, Nested subqueries, Complex queries, Views, Joined relations                                                                                                                                                         |
| <b>Unit-5</b>   | <b>Relational Languages:</b> Tuple Relational calculus, Domain relational calculus, Query by Example, Datalog                                                                                                                                                                                                         |
| <b>Unit-6</b>   | <b>Database design and ER model:</b> Overview of Design process, Entity relationship model, constraints, ER Diagrams, ER Design issues, Weak entity sets, extended ER features                                                                                                                                        |
| <b>Unit-7</b>   | <b>Relational Database Design:</b> Features, Atomic Domains and first normal form, Functional dependency theory decomposition using functional dependencies, decomposition using Multivalued dependencies, More normal forms, database design process                                                                 |
| <b>Unit-8</b>   | <b>Transaction Management:</b> Concept of Transaction, Transaction State, Implementation of atomicity and durability, concurrent execution, Serializability, Recoverability, Implementation of Isolation, testing for Serializability<br><b>Concurrency Control:</b> Lock based protocols, Timestamp based protocols, |

|                |                                                                                                                                                                                                                     |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                | Validation based protocols, Deadlock handling, Insert and Delete operations, Weak levels of consistency                                                                                                             |
| <b>Unit-9</b>  | Integrity constraints, Authorization: GRANT, REVOKE                                                                                                                                                                 |
| <b>Unit-10</b> | <b>Recovery system:</b> Failure classification, storage structure, recovery and atomicity, log-based recovery, recovery with concurrent transactions, buffer management, failure with loss of non- volatile storage |

#### **ADDITIONAL READINGS:**

1. DATABASE SYSTEM CONCEPTS by H. F. KORTH & A. SILBER SCHATZ, TATA MCGRAW HILL, NEW DELHI, YEAR 2006
2. SQL, PL/SQL THE PROGRAMMING LANGUAGE OF ORACLE by IVAN BAYROSS, BPB PUBLICATION.
3. FUNDAMENTALS OF DATABASE SYSTEMS by ELMASRI & NAVATHE, ADDISON & WEISELY, NEW DELHI.
4. DATABASE SYSTEMS by C. J. DATE, PRENTICE HALL OF INDIA, NEW DELHI.
5. SIMPLIFIED APPROACH TO DBMS by P. BHATIA & G. SINGH, KALYANI PUBLISHERS.
6. UNDERSTANDING SQL by MARTIN GRUBER, BPB PUBLICATION, NEW DELHI.
7. RELATIONAL DATABASE: THEORY & PRACTICE by VAL OCCARDI, BPB PUBLICATION, NEW DELHI.

**Course Outcomes: Through this course, student will be able to**

**C01:** classify operations decision areas and differentiate strategies in manufacturing and service contexts.

**C02:** apply quality tools to analyze and improve organizational processes.

**C03:** evaluate productivity and supply chain performance to recommend improvements.

**C04:** design layouts and plan schedules to optimize production efficiency.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                                                                                                           |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Operations Strategy &amp; Decision Areas:</b> Classification of Decision Areas in OM, Brief History, Operations Strategy, Flexibility, Modern vs Traditional Approach                                                                                                                                                                 |
| <b>Unit-2</b>   | <b>Service Operations Management:</b> Services and Their Characteristics, Service Matrix, Service Quality, Role of services in Economy                                                                                                                                                                                                   |
| <b>Unit-3</b>   | <b>Quality Control:</b> Quality, Statistical process Control, Control Charts, X Charts, R Charts, P charts, C charts                                                                                                                                                                                                                     |
| <b>Unit-4</b>   | <b>Quality Management:</b> Acceptance Sampling, Cost of Quality, Total Quality Management, History of TQM, Quality Gurus: Deming, Juran and Ishikawa, Quality Circles, Zero Defect Concept, Service Quality Model, Six Sigma                                                                                                             |
| <b>Unit-5</b>   | <b>Productivity:</b> Various kinds of productivity measures, Multifactor productivity, Efficiency and effectiveness, Business Process Reengineering, Bench Marking, Pursuit of Excellence in Organisations, TATA Business Excellency Model                                                                                               |
| <b>Unit-6</b>   | <b>Supply Chain Management:</b> Purchasing, Value Analysis/ Value Engineering, Vendor Relations. Learning Curve, Forward Buying, Make or Buy Decisions                                                                                                                                                                                   |
| <b>Unit-7</b>   | <b>Inventory Model &amp; Safety Stocks:</b> Optimal Order Quantity, EOQ, Economic Batch Quantity, ABC Analysis, VED Analysis                                                                                                                                                                                                             |
| <b>Unit-8</b>   | <b>Building of a Supply Chain:</b> Orientation & Implementation of Supply Chain functions within an organisation, Single Source vs Multiple Sources                                                                                                                                                                                      |
| <b>Unit-9</b>   | <b>Spatial Decisions:</b> Plant Layout, Basic Types of Layouts and their merits & demerits, Optimisation in process layouts, Use of Schematic Diagrams and software to solve layout problems, Applications in service Industries, Introduction to Cellular Manufacturing and Group Technology, Location and factors affecting a location |
| <b>Unit-10</b>  | <b>Timing Decisions:</b> Production Planning and Control, Importance of time Horizon,                                                                                                                                                                                                                                                    |

|  |                                                                                                            |
|--|------------------------------------------------------------------------------------------------------------|
|  | Dovetailing of Plans, Production control, Assembly line Balancing, Scheduling, Shop loading & Index method |
|--|------------------------------------------------------------------------------------------------------------|

**ADDITIONAL READINGS:**

**Course Outcomes: Through this course student should be able to**

**C01:** recall important poetic terms, literary periods, major authors, and prescribed poems.

**C02:** explain meanings, themes, and stylistic features of poems and literary movements

**C03:** use poetic concepts and historical context in analysis and interpretation of texts.

**C04:** analyze poetic forms, themes, and techniques across periods and poets.

**C05:** evaluate poems and literary trends using evidence and literary theory.

**C06:** compose original verses or literary analyses applying studied poetic devices and styles

**ਕੋਰਸ ਦੇ ਨਤੀਜੇ: ਇਸ ਕੋਰਸ ਰਾਹੀਂ ਵਿਦਿਆਰਥੀ ਯੋਗ ਹੋਣਗੇ:**

**C01:** ਵਿਦਿਆਰਥੀ ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ ਦਾ ਵਿਸ਼ਲੇਸ਼ਣ ਕਰਕੇ ਪੰਜਾਬੀ ਸਾਹਿਤਕ ਇਤਿਹਾਸ ਵਿੱਚ ਇਸਦੀ ਭੂਮਿਕਾ ਦੀ ਵਿਆਖਿਆ ਕਰਨ ਯੋਗ ਹੋਣਗੇ।

**C02:** ਵਿਦਿਆਰਥੀ ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ ਸੰਗ੍ਰਹਿ ਵਿੱਚ ਦਰਜ ਗੁਰੂਆਂ ਅਤੇ ਭਾਈ ਗੁਰਦਾਸ, ਬਾਬਾ ਸ਼ੇਖ ਫਰੀਦ, ਸ਼ਾਹ ਹੁਸੈਨ, ਬੁੱਲ੍ਹੇ ਸ਼ਾਹ ਆਦਿ ਦੀ ਰਚਨਾ ਦਾ ਅਧਿਐਨ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾ ਵਿਸ਼ਲੇਸ਼ਣ ਕਰਨ ਸਮਰੱਥ ਹੋਣਗੇ।

**C03:** ਵਿਦਿਆਰਥੀ ਗੁਰਮੁਖੀ ਲਿਪੀ ਦੀ ਪ੍ਰਾਚੀਨਤਾ, ਪੰਜਾਬੀ ਭਾਸ਼ਾ ਲਈ ਅਨੁਕੂਲਤਾ ਅਤੇ ਵਿਗਿਆਨਿਕ ਅਧਿਐਨ ਕਰਨ ਦੇ ਯੋਗ ਹੋਣਗੇ।

**C04:** ਵਿਦਿਆਰਥੀ ਪੰਜਾਬੀ ਵਿਆਕਰਨ ਦੇ ਨਿਯਮਾਂ ਅਤੇ ਪੈਰਾ ਰਚਨਾ ਦੇ ਸਿਧਾਂਤਾਂ ਨੂੰ ਲਾਗੂ ਕਰਕੇ ਸਹੀ ਭਾਸ਼ਾਈ ਰਚਨਾ ਕਰਨ ਸਮਰੱਥ ਹੋਣਗੇ।

**C05:** ਵਿਦਿਆਰਥੀ ਸਾਹਿਤਕ, ਸੱਭਿਆਚਾਰਕ, ਖੇਡਾਂ ਅਤੇ ਵਿਦਿਅਕ ਸਰਗਰਮੀਆਂ ਬਾਰੇ ਪ੍ਰੈਸ ਨੋਟ ਤਿਆਰ ਕਰਨ ਲਈ ਸਿਧਾਂਤਕ ਗਿਆਨ ਨੂੰ ਵਿਹਾਰਕ ਰੂਪ ਵਿੱਚ ਵਰਤਣ ਯੋਗ ਹੋਣਗੇ।

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                  |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | ਗੁਰਮਤਿ ਕਾਵਿ ਦੀਆਂ ਵਿਸ਼ੇਸ਼ਤਾਵਾਂ ਅਤੇ ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ                                                                                                                                |
| <b>Unit-2</b>   | ਸ੍ਰੀ ਗੁਰੂ ਨਾਨਕ ਦੇਵ ਜੀ, ਸ੍ਰੀ ਗੁਰੂ ਅਰਜਨ ਦੇਵ ਜੀ ਅਤੇ ਭਾਈ ਗੁਰਦਾਸ ਦਾ ਜੀਵਨ ਤੇ ਰਚਨਾ                                                                                                     |
| <b>Unit-3</b>   | 'ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ' ਕਾਵਿ-ਸੰਗ੍ਰਹਿ ਵਿਚ ਦਰਜ ਗੁਰੂ ਨਾਨਕ ਦੇਵ ਜੀ, ਗੁਰੂ ਅਮਰਦਾਸ ਜੀ, ਗੁਰੂ ਅੰਗਦ ਦੇਵ ਜੀ ਅਤੇ ਗੁਰੂ ਰਾਮਦਾਸ ਜੀ ਦੀ ਰਚਨਾ ਦੀ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾ ਅਧਿਐਨ             |
| <b>Unit-4</b>   | 'ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ' ਕਾਵਿ-ਸੰਗ੍ਰਹਿ ਵਿਚ ਦਰਜ ਗੁਰੂ ਅਰਜਨ ਦੇਵ ਜੀ, ਗੁਰੂ ਤੇਗ ਬਹਾਦਰ ਜੀ, ਗੋਬਿੰਦ ਸਿੰਘ ਜੀ ਅਤੇ ਭਾਈ ਗੁਰਦਾਸ ਜੀ ਦੀ ਰਚਨਾ ਦੀ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾ ਅਧਿਐਨ             |
| <b>Unit-5</b>   | ਸੂਫੀ ਕਵਿਤਾ ਦੀਆਂ ਵਿਸ਼ੇਸ਼ਤਾਵਾਂ ਅਤੇ ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ                                                                                                                                 |
| <b>Unit-6</b>   | ਬਾਬਾ ਸ਼ੇਖ ਫਰੀਦ, ਸ਼ਾਹ ਹੁਸੈਨ ਅਤੇ ਬੁੱਲ੍ਹੇ ਸ਼ਾਹ ਦਾ ਜੀਵਨ ਤੇ ਰਚਨਾ ਅਤੇ 'ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ' ਕਾਵਿ-ਸੰਗ੍ਰਹਿ ਵਿਚ ਦਰਜ ਬਾਬਾ ਸ਼ੇਖ ਫਰੀਦ ਜੀ ਦੀ ਰਚਨਾ ਦੀ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾ ਅਧਿਐਨ |
| <b>Unit-7</b>   | 'ਗੁਰਮਤਿ ਅਤੇ ਸੂਫੀ ਕਾਵਿ' ਕਾਵਿ-ਸੰਗ੍ਰਹਿ ਵਿਚ ਦਰਜ ਸ਼ਾਹ ਹੁਸੈਨ, ਵਜੀਦ, ਸੁਲਤਾਨ ਬਾਹੂ ਅਤੇ ਬੁੱਲ੍ਹੇ ਸ਼ਾਹ ਦੀ ਰਚਨਾ ਦੀ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾ ਅਧਿਐਨ                                    |

|                |                                                                                                 |
|----------------|-------------------------------------------------------------------------------------------------|
| <b>Unit-8</b>  | ਪੰਜਾਬੀ ਸ਼ਬਦ ਜੋੜਾਂ ਦੇ ਨਿਯਮ, ਗੁਰਮੁਖੀ ਲਿਪੀ ਦੀ ਪ੍ਰਾਚੀਨਤਾ, ਪੰਜਾਬੀ ਭਾਸ਼ਾ ਲਈ ਅਨੁਕੂਲਤਾ ਅਤੇ ਵਿਸ਼ੇਸ਼ਤਾਵਾਂ |
| <b>Unit-9</b>  | ਪੈਰਾ ਰਚਨਾ, ਵਿਆਕਰਨਿਕ ਸ਼ਬਦ ਸ਼੍ਰੇਣੀਆਂ-ਨਾਂਵ, ਪੜਨਾਂਵ, ਵਿਸ਼ੇਸ਼ਣ ਅਤੇ ਕਿਰਿਆ                             |
| <b>Unit-10</b> | ਅਖਬਾਰਾਂ ਲਈ ਪ੍ਰੈਸ ਨੋਟ (ਸਾਹਿਤਕ, ਸੱਭਿਆਚਾਰਕ, ਖੇਡਾਂ ਅਤੇ ਵਿਦਿਅਕ ਸਰਗਰਮੀਆਂ ਬਾਰੇ                         |

**Course Outcomes: Through this course, students will be able to**

**CO1:** analyze the causes, social impacts, and outcomes of World Wars I and II.

**CO2:** understand the origins, key events, and global impact of the Cold War and its conclusion.

**CO3:** evaluate decolonization processes, the rise of the Third World, and the role of Non-Alignment and the UN.

**CO4:** examine European integration, the collapse of the Soviet Union, and the transition to a unipolar world order.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                         |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>World War I:</b> Social Implications of the 1 <sup>st</sup> World War, Causes and The Consequences of World War I.                                                                  |
| <b>Unit-2</b>   | <b>World War II:</b> Social Implications of The 2 <sup>nd</sup> World War, Causes and Political Consequences of World War II.                                                          |
| <b>Unit-3</b>   | <b>The Cold War:</b> Emergence of Two Blocs, Integration of West Europe and US Strategy; Communist East Europe, Major Conflicts - Arab-Israel Conflict, Vietnam War, Afghan Civil War. |
| <b>Unit-4</b>   | <b>End of the Cold War:</b> Conditions Responsible for The End of Cold War & US Ascendancy in The World.                                                                               |
| <b>Unit-5</b>   | <b>Emergence of Third world and Non-Alignment:</b> UN and Dispute Resolution.                                                                                                          |
| <b>Unit-6</b>   | <b>Colonial Liberation:</b> Latin America - Bolivia, Arab World - Egypt, Africa - Apartheid to Democracy, South East Asia Vietnam.                                                     |
| <b>Unit-7</b>   | <b>Decolonialization:</b> Break Up of Colonial empires - British, French, and Dutch.                                                                                                   |
| <b>Unit-8</b>   | <b>Unification of Europe:</b> Post War Foundations - NATO and European Community (Union). Consolidation and Expansion of European Community.                                           |
| <b>Unit-9</b>   | <b>Soviet Disintegration and The Unipolar World:</b> Factors in the Collapse of Soviet Communism and Soviet Union, 1985-1991, Political Changes in East Europe (1989-1992).            |
| <b>Unit-10</b>  | <b>Maps:</b> <ul style="list-style-type: none"> <li>• World War I</li> <li>• World War II</li> </ul> <b>Areas Under the Influence of Cold War</b>                                      |

**Course Outcomes: Through this course, student should be able to**

**CO1:** comprehend the basic statistical tools and techniques.

**CO2:** interpret the skills of using most widely used statistical techniques in decision making.

**CO3:** appreciate and analyze the role of statistical techniques for making aware scientific decisions.

**CO4:** calculate and apply measures of location and measures of dispersion -- grouped and ungrouped data cases.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                     |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | Measure of Central Tendency: Introduction and Uses of Central Tendency, Central Tendency - Mean, Median, Mode, Percentile, Decile and Quartiles                                                    |
| <b>Unit-2</b>   | Measure of Dispersion and Skewness: Introduction, Range, Mean deviation, Standard deviation, Coefficient of Variation, Variance, Introduction to Skewness - Karl Pearson's Coefficient of Skewness |
| <b>Unit-3</b>   | Correlation Analysis and Regression Analysis: Introduction to Correlation, Measure of Correlation - Scatter Diagram, Karl Pearson's Coefficient of Correlation                                     |
| <b>Unit-4</b>   | Spearman's Rank Correlation Method. Introduction to Regression, Least Square Regression Equation for Two Variables Case.                                                                           |
| <b>Unit-5</b>   | Index Numbers: Meaning, Importance of Index Numbers, Problems in The Construction of Index Numbers                                                                                                 |
| <b>Unit-6</b>   | Methods of Constructing Index Number Laspeyres Method, Paasche Method, Fisher Method, Bowley's Method, Marshall - Edgeworth Method, Chain Base Index, Consumer - Price Index                       |
| <b>Unit-7</b>   | Analysis of Time Series: Concept of Time Series and Its Components, Method of Semi- Average, Method of Moving Average, Method of Simple Average                                                    |
| <b>Unit-8</b>   | Probability: Definition and Its Concept, Addition Theorem, Multiplicative Theorem                                                                                                                  |
| <b>Unit-9</b>   | Probability Distribution: Concept of Probability Distribution, Binomial Distribution, Poison Distribution, Normal Distribution                                                                     |
| <b>Unit-10</b>  | Sampling and Sampling Distribution: Test of Hypothesis - Large Sample Test, Small Sample Test, Chi-Square Test                                                                                     |

|                    |                |                     | <b>30</b>                                   | <b>70</b>       |

**Course Outcomes: Through this course, students will be able to**

**C01:** Explain the concept, causes, and levels of social disorganization.

**C02:** Analyze major social issues such as adolescence problems, substance abuse, family violence, and challenges of aging.

**C03:** Evaluate socio-economic issues including working women's challenges, poverty, and corruption, along with preventive measures.

**C04:** Assess the causes, characteristics, and solutions for ethnic conflicts in India.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                               |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | Social Disorganization: Concept of Social Disorganization, Meaning and Definitions, Causes of Social Disorganization.                                                                        |
| <b>Unit-2</b>   | Levels of Social Disorganization: Sociological Indices of Social Disorganization, Personal Disorganization, Family Disorganization, Social Disorganization, Suicide - Causes and Prevention. |
| <b>Unit-3</b>   | Problems of Adolescence: Meaning, Causes, Problem Faced by Adolescence in The Family, Delinquency, Child Abuse - Causes and Treatment.                                                       |
| <b>Unit-4</b>   | Alcoholism and Drug Addiction: Meaning, Phases and Types, Causes and Consequences, Treatment.                                                                                                |
| <b>Unit-5</b>   | Family and Conjugal Violence: Introduction, Definition, Major Theoretical Frame Work, Treatment and Prevention, Wife Abuse - Causes And Coping Mechanism.                                    |
| <b>Unit-6</b>   | Problems of the Aged: Introduction, Historical Perspective, The Aged in India, Old Age Homes, Conclusion.                                                                                    |
| <b>Unit-7</b>   | Problem of Working Women: Introduction, Causes of Women's Employment, Role Conflict of Working Women, Consequences of Working Mother's Employment, Problem of Single Working Women.          |
| <b>Unit-8</b>   | Poverty: Meaning, Explanation of Poverty, Poverty in India, Anti Poverty Program of The Indian Government, Five Steps to Remove Poverty, Conclusion.                                         |
| <b>Unit-9</b>   | Corruption: Meaning, Characteristics, Three Stages of Corruption, Causes and Consequences, Prevention of Corruption and Conclusion.                                                          |
| <b>Unit-10</b>  | Ethnic Conflicts: Meaning, Ethnic Conflicts in India, Common Features of Ethnic Conflict Situations, Policy Measures to Solve The Problem, Conclusion.                                       |

|                    |                |                     | <b>CA</b>        | <b>ETE(Th.)</b> |
|                    |                |                     | <b>30</b>        | <b>70</b>       |

**Course Outcome: Through this course, students will be able to**

**C01:** explain computer network types, topologies, reference models, and transmission media.

**C02:** describe networking devices, switching, multiplexing, and modulation techniques.

**C03:** apply data link and network layer concepts for framing, error control, routing, and congestion management.

**C04:** understand basic cryptography techniques and network security concepts.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Introduction to Computer Networks:</b> Uses of computer networks, Network Hardware: LAN, WAN, MAN, Wireless, Home networks, Internetworks. <b>Network topologies:</b> STAR, Ring, BUS etc.                 |
| <b>Unit-2</b>   | <b>Network Software:</b> Layers, Protocols, Reference models: OSI Model, TCP/IP model, comparison of OSI and TCI reference model.                                                                             |
| <b>Unit-3</b>   | <b>Physical Layer:</b> Guided Transmission Media: Magnetic media, Twisted pair, Coaxial cables- base band, broadband, optical fiber transmission. <b>Wireless Transmission,</b> Satellites, PSTN              |
| <b>Unit-4</b>   | <b>Networking Devices:</b> Hub, Router, Switch, Bridge, Gateway<br><b>Switching Techniques:</b> Circuit Switching, Message switching, packet switching                                                        |
| <b>Unit-5</b>   | <b>Multiplexing:</b> Frequency Division, Time Division Multiplexing<br><b>Modulation Techniques:</b> Amplitude, Frequency, Phase                                                                              |
| <b>Unit-6</b>   | <b>Data Link Layer:</b> Design Issues - Services provided to the network layer, framing, error control, flow control,<br><b>Error Detection and Correction:</b> Error Correcting Codes, Error Detecting Codes |
| <b>Unit-7</b>   | <b>Data link protocols:</b> Elementary Data link protocols, Sliding Window protocols, HDLC, Data link layer in Internet<br><b>MAC Sublayer:</b> CSMA/CD, <b>Ethernet:</b> Ethernet Cabling, Fast Ethernet.    |
| <b>Unit-8</b>   | <b>Network Layer:</b> Design Issues, Routing Algorithms: Optimality principled, shortest path routing, distance vector routing, link state routing                                                            |
| <b>Unit-9</b>   | <b>Congestion Control Algorithms:</b> General principles, congestion prevention policies                                                                                                                      |
| <b>Unit-10</b>  | <b>Network Security:</b> Cryptography – Introduction, Substitution ciphers, transposition ciphers                                                                                                             |

**Course Objectives: Through this course, students will be able to**

**C01:** analyse the evolution, principles, policies, and functions of Human Resource Management and its integration with organisational strategy.

**C02:** apply systematic HR processes for job analysis, workforce planning, recruitment, selection, training, and development.

**C03:** evaluate and design performance management and compensation systems aligned with organisational objectives.

**C04:** manage industrial relations, employee welfare, health, and safety to promote a positive and productive work environment.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                                                                 |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Human Resource Management:</b> Evolution, Functions, HRM Policies & Principles, System Approach to Human Resource Management; HR Relationship with other Departments; e-HRM, Human capital Management, Environment of HRM- Internal & external forces affecting the HR function. Global HRM |
| <b>Unit-2</b>   | <b>Strategic Human Resource Management:</b> HRM & Its Role in Creating Competitive Advantage; Creating Strategic HRM System.                                                                                                                                                                   |
| <b>Unit-3</b>   | <b>Job Analysis, Job Enrichment and Job Enlargement:</b> Methods for Collecting Job Analysis Information, Human Resource Planning- Process, Affecting Factors & Its Link with Strategic Planning Human Resource Information System.                                                            |
| <b>Unit-4</b>   | <b>Recruitment &amp; Selection Process:</b> Planning and Forecasting, Effective Recruiting, Internal and External Sources of Candidates, Recruiting A Diverse Workforce, Employee Testing and Selection<br>Induction And Placement: Yhe Challenges                                             |
| <b>Unit-5</b>   | <b>Training And Development:</b> T&D Process, Methods of Employee Training, Methods Of Executive Development, Evaluating the Training Effort.                                                                                                                                                  |
| <b>Unit-6</b>   | <b>Performance Management:</b> Components Of Performance Management, Performance Appraisal Methods, Potential Appraisal, Performance Counselling, Common Rating Errors, Creating the Total Performance Management Process.                                                                     |
| <b>Unit-7</b>   | <b>HRD:</b> Need And Scope, HRD Climate, HRD Practices in Indian Organizations, Quality Of Work Life, Employee Empowerment, Career Planning, Knowledge Management, Mentoring & Reverse Mentoring.                                                                                              |
| <b>Unit-8</b>   | <b>Compensation Management:</b> Establishing Pay Plans and Rates, Job evaluation , Pricing Managerial and Professional Jobs, Competency-Based Pay, Variable Pay Plans, Fringe Benefits.                                                                                                        |

|                |                                                                                                                                                                      |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-9</b>  | <b>Industrial Relations:</b> Industrial Relations & Trade Unions, Dispute Resolution & Grievance Management; Discipline & Disciplinary Action, Employee Empowerment. |
| <b>Unit-10</b> | <b>Health &amp; Safety Management:</b> Management role in safety, causes and preventions of accident, <b>Workplace Health Hazards:</b> problems and remedies         |

**Course Outcomes: Through this course student should be able to**

**C01:** Recall author details, plot points, and themes of prescribed texts.

**C02:** Understand: Explain main ideas, messages, and literary elements in the works.

**C03:** Use textual references to support answers and discussions.

**C04:** Compare themes, characters, and styles across texts and poems.

**C05:** Critically assess authors' perspectives and the relevance of themes.

**C06:** Develop original responses, interpretations, or creative rewritings based on the texts.

| <b>Unit No.</b> | <b>Content</b>                                                        |

**ਕੋਰਸ ਦੇ ਨਤੀਜੇ: ਇਸ ਕੋਰਸ ਰਾਹੀਂ ਵਿਦਿਆਰਥੀ ਯੋਗ ਹੋਣਗੇ:**

**C01:** ਵਿਦਿਆਰਥੀ ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਸਾਹਿਤ ਦੇ ਸਿਧਾਂਤਕ ਅਤੇ ਇਤਿਹਾਸਕ ਪਰਿਪੇਖ ਦੀ ਪਛਾਣ ਅਤੇ ਵਿਆਖਿਆ ਕਰਨ ਯੋਗ ਹੋਣਗੇ।

**C02:** ਵਿਦਿਆਰਥੀ ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵਿਤਾ, ਗਲਪ, ਨਾਟਕ, ਇਕਾਂਗੀ ਅਤੇ ਵਾਰਤਕ ਦੇ ਨਿਕਾਸ ਅਤੇ ਵਿਕਾਸ ਦਾ ਵਿਸ਼ਲੇਸ਼ਣ ਅਤੇ ਮੁਲਾਂਕਣ ਕਰਨ ਦੇ ਸਮਰੱਥ ਹੋਣਗੇ।

**C03:** ਵਿਦਿਆਰਥੀ ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵਿਤਾ ਦੀਆਂ ਪ੍ਰਵਿਰਤੀਆਂ ਦਾ ਅਧਿਐਨ ਕਰਕੇ ਉਨ੍ਹਾਂ ਦੀਆਂ ਵਿਸ਼ੇਸ਼ਤਾਵਾਂ ਦੀ ਤੁਲਨਾ ਕਰਨ ਯੋਗ ਹੋਣਗੇ।

**C04:** ਵਿਦਿਆਰਥੀ ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਗਲਪ, ਨਾਟਕ, ਇਕਾਂਗੀ ਅਤੇ ਵਾਰਤਕ ਦੇ ਸਿਧਾਂਤਕ ਪੱਖਾਂ ਦਾ ਵਰਗੀਕਰਨ ਅਤੇ ਸਮੀਖਿਆ ਕਰਨ ਸਮਰੱਥ ਹੋਣਗੇ।

**C05:** ਵਿਦਿਆਰਥੀ ਪੰਜਾਬੀ ਆਲੋਚਨਾ ਦੇ ਨਿਕਾਸ ਅਤੇ ਵਿਕਾਸ ਦਾ ਵਿਗਿਆਨਿਕ ਅਧਿਐਨ ਕਰਕੇ ਸਾਹਿਤਕ ਰਚਨਾਵਾਂ ਵਿੱਚ ਉਸ ਦੇ ਪ੍ਰਯੋਗ ਦੀ ਵਿਆਖਿਆ ਕਰਨ ਯੋਗ ਹੋਣਗੇ।

**Course Outcomes: Through this course student should be able to**

**C01:** Observe the current environmental issues and associated problems.

**C02:** illustrate the basic knowledge of environment and its various components.

**C03:** devise new approaches to reduce various types of environmental pollution.

**C04:** identify the environment policies and practices.

| <b>Unit No.</b> | <b>Content</b>                                                                                                                                                                                                                                                                                                   |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit-1</b>   | <b>Multidisciplinary nature of environmental studies, Scope and importance:</b> Concept of sustainability and sustainable development, Land resources: Land degradation, soil erosion and desertification.                                                                                                       |
| <b>Unit-2</b>   | <b>Deforestation:</b> Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations.                                                                                                                                                                               |
| <b>Unit-3</b>   | <b>Water:</b> Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water, Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs.                                                                                |
| <b>Unit-4</b>   | <b>Ecosystem, structure and function of ecosystem, Energy flow in an ecosystem:</b> food chains, food webs and ecological succession ecological pyramids, Case studies of the following ecosystems: a) forest ecosystem b) grassland ecosystem c) desert ecosystem d) aquatic ecosystem.                         |
| <b>Unit-5</b>   | <b>Levels of biological diversity:</b> genetic, species and ecosystem diversity, Biogeographic zones of India, Biodiversity patterns and global biodiversity hot spots, India as a mega diversity nation, Endangered and endemic species in India.                                                               |
| <b>Unit-6</b>   | <b>Threats to biodiversity:</b> Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions, Conservation of biodiversity: In-situ and ex-situ conservation of biodiversity, Ecosystem and biodiversity services: ecological, economic, social, ethical, aesthetic and Informational value. |
| <b>Unit-7</b>   | <b>Environmental pollution:</b> Types, causes, effects and controls; Air pollution, Ill-effects of Fireworks.                                                                                                                                                                                                    |
| <b>Unit-8</b>   | <b>Environmental pollution:</b> Types, causes, effects and controls: water, soil and noise pollution, nuclear hazards and human health risks, Pollution case studies.                                                                                                                                            |
| <b>Unit-9</b>   | <b>Climate change,</b> global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture.                                                                                                                                                                                        |
| <b>Unit-10</b>  | <b>Environment Laws:</b> Environment Protection Act, Air (Prevention & Control of Pollution) Act, Water (Prevention and control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act.                                                                                                             |
| <b>Unit-11</b>  | <b>International agreements:</b> Montreal and Kyoto protocols and Convention on Biological Diversity (CBD), Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context, Solid waste management: Control measures of urban and industrial waste                               |
| <b>Unit-12</b>  | <b>Human population growth:</b> Impacts on environment, human health and                                                                                                                                                                                                                                         |

|                |                                                                                                                                                              |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                | welfare.                                                                                                                                                     |
| <b>Unit-13</b> | <b>Disaster management:</b> floods, earthquake, cyclones and landslides, Environmental movements: Chipko, Silent valley, Bishnoi's of Rajasthan.             |
| <b>Unit-14</b> | <b>Environmental ethics:</b> Role of Indian and other religions and cultures in environmental conservation, Environmental communication and public awareness |
